

# INTERNATIONAL INVASIVE LOBULAR CARCINOMA SYMPOSIUM

Official 2026 Agenda • San Francisco, CA

## Wednesday, September 23, 2026

### 7:30 am - 11:45 am Patient Advocate Session

*Breakfast Included*

### 11:45 am - 12:45 pm Welcome Lunch

Open to all conference attendees

### 12:45 pm - 1:00 pm Opening of the Symposium

### 1:00 pm - 1:30 pm Debate 1: Tumor morphology alone should be used to diagnose ILC

**SPEAKERS:** Fouad Boulous, MD and Stu Schnitt, MD | **DISCUSSANT:** Anne Vincent-Salomon, MD, PhD

### 1:30 pm - 2:45 pm Scientific Session 1: Genetics, Risk, and Exposures

*Moderators: Fresia Pareja, MD, PhD & Nicole Dearing*

- Pathogenic germline variants in invasive lobular breast cancer — **Giovanni Corso, MD, PhD**
- Hormonal exposures in ILC development — **Cathrin Brisken, MD, PhD**
- Latest data in hormone replacement therapy — **Mindy Goldman, MD**
- Lobular carcinoma in situ: management strategies — **Tari King, MD**

### 2:45 pm - 3:00 pm Snacks and Exhibits Break

### 3:00 pm - 4:00 pm Oral Abstract Presentations (Session 1)

### 4:00 pm - 5:15 pm Scientific Session 2: The ILC Cell & Microenvironment

*Moderators: Rachel Natrajan, PhD & Carolyn Reuss*

- Unique proteomic features of ILC — **Chip Petricoin, PhD**
- Tumor microenvironment in ILC — **Fatima Mechta-Grigoriou, PhD**
- Metabolism in ILC — **Rebecca Riggins, PhD**
- New methods to study cell cycle in ILC — **Wayne Stallaert, PhD**

### 5:15 pm - 6:00 pm Advocate Research RoundUp

### 5:30 pm - 7:30 pm Poster Session and Networking

Hyatt Regency San Francisco  
5 Embarcadero Center  
September 23–25, 2026

## Thursday, September 24, 2026

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 7:00 am - 8:00 am   | <b>Breakfast Banter and Breakthroughs</b><br>Advocate/Researcher Tables                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 8:00 am - 9:15 am   | <b>Scientific Session 3: Mechanisms of Metastasis</b><br><i>Moderators: Julia Houthuijzen, PhD &amp; Andrea Lener</i> <ul style="list-style-type: none"><li>• Metastatic interactome: collective cell migration in breast cancer — <b>Kevin Cheung, MD</b></li><li>• Autophagy in breast cancer — <b>Jay Debnath, MD</b></li><li>• Novel treatment targets in metastatic ILC — <b>Chris Lord, PhD</b></li><li>• Tissue mechanics in ER positive breast cancer — <b>Valerie Weaver, PhD</b></li></ul>                                              |
| 9:15 am - 9:45 am   | <b>Debate 2: Cytotoxic chemotherapy is ineffective in patients with metastatic ILC</b><br><b>SPEAKERS:</b> Rebecca Shatsky, MD and Sherry Shen, MD                                                                                                                                                                                                                                                                                                                                                                                                |
| 9:45 am - 10:15 am  | <b>Snacks and Exhibits Break</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 10:15 am - 11:30 am | <b>Scientific Session 4: Model Systems &amp; Pathology</b><br><i>Moderators: Anne Vincent-Salomon, MD, PhD &amp; Ciara Gustafson</i> <ul style="list-style-type: none"><li>• New and existing models of ILC including organoids — <b>Adrian Lee, PhD</b></li><li>• New ILC rat model — <b>Yi Li, PhD</b></li><li>• A New Era for ILC Histologic Variants: From Improved Morphological Criteria to AI-Based Prediction — <b>Lounes Djerroudi, MD, PhD</b></li><li>• Mitotic vulnerabilities of ILC — <b>Ruth Keri, PhD</b></li></ul>               |
| 11:30 am - 12:00 pm | <b>Keynote Address 1: Hereditary CDH1 Mutations: The identification and evolution of a cancer syndrome</b><br><b>KEYNOTE SPEAKER:</b> Parry Guilford, PhD                                                                                                                                                                                                                                                                                                                                                                                         |
| 12:00 pm - 1:15 pm  | <b>Lunch</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1:15 pm - 2:30 pm   | <b>Scientific Session 5: Diagnostics and Clinical Management</b><br><i>Moderators: Suzanne Conzen, MD &amp; Jade Moran</i> <ul style="list-style-type: none"><li>• Unique aspects of ILC in pre-menopausal patients — <b>Rachel Jankowitz, MD</b></li><li>• Modifiable risk factors impacting ILC outcomes — <b>Karen van Baelen, MD, PhD</b></li><li>• Management of the axilla in ILC — <b>Priscilla McAuliffe, MD, PhD</b></li><li>• Immunotherapy in ILC: tumor microenvironment for treatment selection — <b>Jason Mouabbi, MD</b></li></ul> |
| 2:30 pm - 3:30 pm   | <b>Oral Abstract Presentations (Session 2)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 3:30 pm - 3:45 pm   | <b>Snacks and Exhibits Break</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3:45 pm - 5:00 pm   | <b>Scientific Session 6: Clinical Trial Results &amp; Advocacy</b><br><i>Moderators: Megan Kruse, MD &amp; Deborah Romer</i> <ul style="list-style-type: none"><li>• PELOPS — <b>Rinath Jeselsohn, MD, PhD</b></li><li>• Neoadjuvant neratinib — <b>Laura Kennedy, MD</b></li><li>• LOBSTER — <b>Maria Karsten, MD</b></li><li>• Integrating patient advocates in ILC research — <b>Mo Rimawi, MD</b></li></ul>                                                                                                                                   |
| 5:00 pm - 5:45 pm   | <b>Advocate Research RoundUp</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 6:30 pm - 8:00 pm   | <b>Symposium Dinner</b><br>Registration Required                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Friday, September 25, 2026

7:00 am - 8:00 am **Breakfast**

8:00 am - 9:00 am **Scientific Session 7: Endocrine Resistance & Novel Targets**

*Moderators: Pete Simpson, PhD & Megan-Claire Chase*

- Endocrine therapy resistance in ILC — **Ariella Hanker, PhD**
- Liquid biopsy other than blood — **François Richard, PhD**
- Combined vulnerabilities and potential interventions — **Patrick Derksen, PhD**

9:00 am - 9:30 am **Keynote Address 2: Novel approaches to screening and clinical trials for breast cancer: how to improve care for ILC**

**KEYNOTE SPEAKER:** Laura Esserman, MD, MBA

9:30 am - 10:00 am **Snacks and Exhibits Break**

10:00 am - 11:00 am **Scientific Session 8: Advanced Imaging & Artificial Intelligence**

*Moderators: David Lim, MD, PhD & Nikoo McGoldrick*

- Clinical trial on AI detection of ILC on mammography — **Manisha Bahl, MD**
- Contrast enhanced mammography in ILC — **Molly Hogan, MD**
- Whole body MRI for metastatic ILC — **Elleke Dresen, MD, PhD**

11:00 am - 11:30 am **Dynami Foundation Leigh Pate Memorial Lecture**

**Historical Perspective: 10 years since first ILC Symposium**

**LECTURER:** Steffi Oesterreich, PhD

11:30 am - 12:00 pm **Presentation on advocacy in ILC**

12:00 pm - 1:00 pm **Lunch**

1:00 pm - 2:15 pm **Scientific Session 9: SNMMI Special Session — Imaging in ILC**

*Moderators: Pooja Advani, MBBS, MD & Amy Russell-Parliman*

- ILC: Review of initial staging modalities, CT, and bone scan — **Gary Ulaner, MD, PhD**
- Staging solutions for metastatic disease: FDG and FES PET — **Hannah Linden, MD**
- Emerging PET imaging modalities: FAPI and PSMA — **Wenhui Zhou, MD, PhD**
- Research and trials regarding theranostics for breast cancer — **David Mankoff, MD, PhD**

2:15 pm - 2:45 pm **Snacks and Exhibits Break**

2:45 pm - 3:45 pm **Scientific Session 10: Radiotherapy, Clinical Trials**

*Moderators: Meghan R. Flanagan, MD & Brenda Sulick, PhD*

- Dysfunctional DNA repair: PARPi and radiation sensitivity in ILC — **Matt Sikora, PhD**
- Tumor heterogeneity from autopsy studies — **Christine Desmedt, PhD**
- Radiotherapy in ILC — **Elinor Sawyer, MD**

3:45 pm - 4:15 pm **Debate 3: Patients with ILC should be treated with neoadjuvant therapy**

**SPEAKERS:** Jo Chien, MD and Julia Foldi, MD, PhD

4:15 pm - 5:15 pm **Complex patient case discussion**

Panel Discussion

5:15 pm - 5:30 pm **Closing the symposium**

Hyatt Regency San Francisco  
5 Embarcadero Center  
September 23–25, 2026

# INTERNATIONAL INVASIVE LOBULAR CARCINOMA SYMPOSIUM

Optional Activities • San Francisco, CA

---

## Friday, September 25, 2026

### Friday Evening

#### Optional Activity

Alcatraz cruise (Registration to open soon - limited space available)

## Saturday, September 26, 2026

### Day Trip

#### Optional Activity

Napa Valley Wine/Art Tour (Registration to open soon - limited space available)

Hyatt Regency San Francisco  
5 Embarcadero Center  
September 23-25, 2026
